

## Ratchet Shears

Ratchet shears are ideal for cutting PVC, PE, PP, PEX, and ABS pipe. One-hand models **RS1** and **RS1PLT** offer a 7-step ratcheting mechanism for best mechanical advantage and smoothest operation. **RS1PLT** has a corrosion-resistant, plated steel blade. The **RS2** features 2" capacity, extra wide, v-style jaws for easy alignment, and long handles for leverage on tough-to-cut pipe. **RS7290** one-hand style, 2" capacity shears cut PE and PVC pipe used in gas, water, plumbing, and industrial applications, as do the other ratchet shears. All ratchet shears' blades can be easily sharpened or replaced.

## Scissor Shears

Scissor shears squeeze together for fast cutting of thin wall and small diameter PE, rubber, or nylon tubing. Rotate shears around tubing while squeezing handles together for best cut. Teflon®-coated replacement blades for **SC1** and **SC125**. Tougher stainless steel blades (**SC1BSS**) are better for cutting PVC. Knockout pin included with each new blade. Replacement blades available.
